

Fun fact:

Chickens can communicate to their chicks before they've even hatched— and the chicks can chirp back!

Me leaving work as soon as it hits 5pm on a Friday

Trying to dress for this weather like:

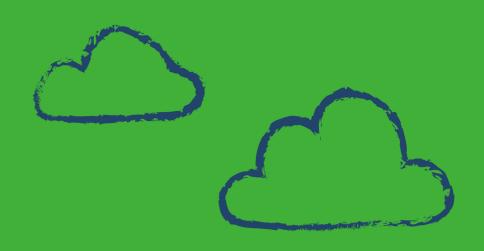

what is enrichment?

Enrichment involves providing your pet with novel and interesting stimuli, like toys or puzzles.

As every chicken owner knows, chickens are very intelligent. For a high quality of life, they need the chance to explore, learn and play, just like any other pet.

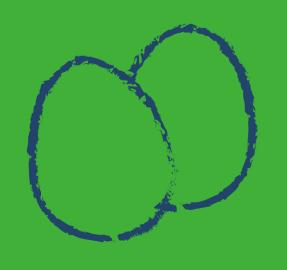

why is it important?

Enrichment keeps your chooks happy, healthy, more active, and less likely to misbehave out of boredom.

It's fun and relaxing for your chickens, and could even help them lay more eggs— that's a win-win!
